### Scratching from a Meet

Scratching from an event lets the organisers know that a swimmer is not going to participate in an event. The more notice given – the better the chance of improving the racing for everyone else remaining in the event.

Important: While entries are open, My Swim Results will refund your entry fee but once entries close – a refund will need a medical certificate / advice as the entries would be sorted into heats, names will be in programs and the meet planned.

If you know that it will take a while to organise a medical certificate – let us know that the swimmer is scratching and that a medical certificate will be provided later. This way we can plan for the scratching to ensure that the competition is least affected.

### Scratching before the meet starts

Scratching before the meet gives the organisers a chance to organise better racing for the remaining participants. The more notice given when scratching the more options for the organisers / officials have.

If entries have closed then there is a good chance that the printed program will still have the swimmer listed in the program but the electronic records would be updated so that the timing system can be adjusted or plans made to solve events having too many empty lanes.

Most efficient way to scratch before the meet starts is through the calendar. Clicking on the envelope icon beside the meet host name – will send an email to the host of the meet.

One of the options will be “Scratching” and once you choose that option – you will be able to enter in the swimmers name. In the message body – let us know what events to scratch the swimmer from.

Pressing send at the bottom will send the request off to the organisers.

## Scratching at the meet

Scratching on the day can be done at the marshalling desk. They will ask to fill out a scratching form which will have at least the name, club, event number and signature. (Some scratching forms also have heat and lane.)
